MEMORANDUM FOR: DD/P/

ATTENTION: /

FROM: Chief, . ORR

SUBJECT: Soviet Ship Arrivals at Italian Ports During 1964

1. Attached are two tables showing Soviet ship arrivals at Italian ports in 1964. The tables exclude port calls of Soviet ships which arrived during 1963 and departed in 1964. The tables also exclude three port calls made by Italian-built Soviet tankers which were launched in 1964 and were undergoing sea trials, and one port call by a Soviet tanker which made an emergency stop for medical attention for a crew member.

2. Only a few Soviet ships made calls in Italy for bunkering purposes. There were nine port calls for bunkering by dry cargo ships and one by a tanker at the ports of Venice, Naples, Ancona, and Messina.

3. Imports in 1964 consisted mainly of crude oil, ores (coal, pyrites), metal, timber, grain, sugar, paraffin and asbestos. Exports during the year included chemical products, synthetic rubber and textile fibers, fertilizer, citrus fruit, gasoil, and general cargo including machinery and spare parts.

4. The length of stay in ports (usually one day by passenger ships, 1-3 days by tankers and up to 2 weeks by cargo ships) was consistent with the type of cargo operations in the ports by these ships and delays caused by unavailability of berths and occasional labor troubles in Italian ports during the year.

Attachment:
As stated above.
